

AIAA | Dr. Martin

March 11th 2021 | Zoom: 7pm | [Join HERE](#)

There are many ways to have an engineering career in the Aerospace Industry. The type of work you do will affect your opportunities in the future, and you never know how your past work will help you. Please join Dr. Michael Martin as he discusses his aerospace career as a former rocket engine tester, a senior design engineer on Orion, a flight controller for ISS, and a rocket propulsion researcher. His goal is to also provide advice for new engineers.
