

Biography of Dr. Albert Allen Jackson IV

Entered the US civil service in January of 1966 as an engineer, first crew training on the Gemini Crew Trainer, worked on a simulator for the Lunar Landing Training Vehicle and then became full time Apollo crew trainer on the Lunar Module Simulator, subsystem the Abort Guidance System.

I returned to graduate work in physics in late 1970 gaining my Ph.D. in physics in Jan 1975 specializing in 'applied' General Relativity.

I returned to the Johnson Space Center working for MacDonnell Douglas and Computer Science Corporation on flight planning software for the Space Shuttle Orbiter.

In 1988 I moved to Lockheed Corporation working 5 years on solar system dust dynamics and then 5 years on Orbital Debris.

In 1998 I moved to Engineering Simulation and worked there for 12 years.

I was a visiting scientist at the Lunar and Planetary Institute in Houston Texas for 30 years.

Currently an astronautics consultant at Triton Systems LLC.
